

2010 MICROTAG RECOVERY REPORT

REPORT ON THE CODED WIRE TAG RETURNS FOR 2010

Dr N Ó Maoiléidigh
Anne Cullen
Nigel Bond

This report gives recapture details of microtagged salmon recovered during the 2010 commercial and recreational fishing season and includes broodstock. The report contains 1 and 2 sea winter recoveries, that is those fish which were released and migrated in 2009 and 2008 respectively.

The tag code and the release information pertaining to that code are at the top of each listing. The tables at the end of the listing include annual statistics, a summary of the distribution of recoveries by fisheries, by capture method and over time.

If tags of Irish origin were recovered in the Faroese or West Greenland fisheries, they are also included in this report.

It should be noted that all occurrences of 2011 recoveries appearing in the 2010 Recovery Report must be treated as incomplete and provisional as processing and data input is ongoing.

The printout headings are explained as follows:

SAMP.CODE example 10G0001

The Sample Code refers to the year and location of sampling. The code is as follows -

C = Cork

F = Faroe Islands

G = Galway

L = Limerick

M = Mayo

N = Northern Ireland

X = Ex - Ireland (tags found outside of Ireland)

Y = Ballyshannon

REC.LOCATION example Corrib River

This is the Recovery Location and is given as precisely as possible.

AREA example 6A or COR R

This refers to ICES Sea Areas with modifications and river areas as shown on the map.

DATE

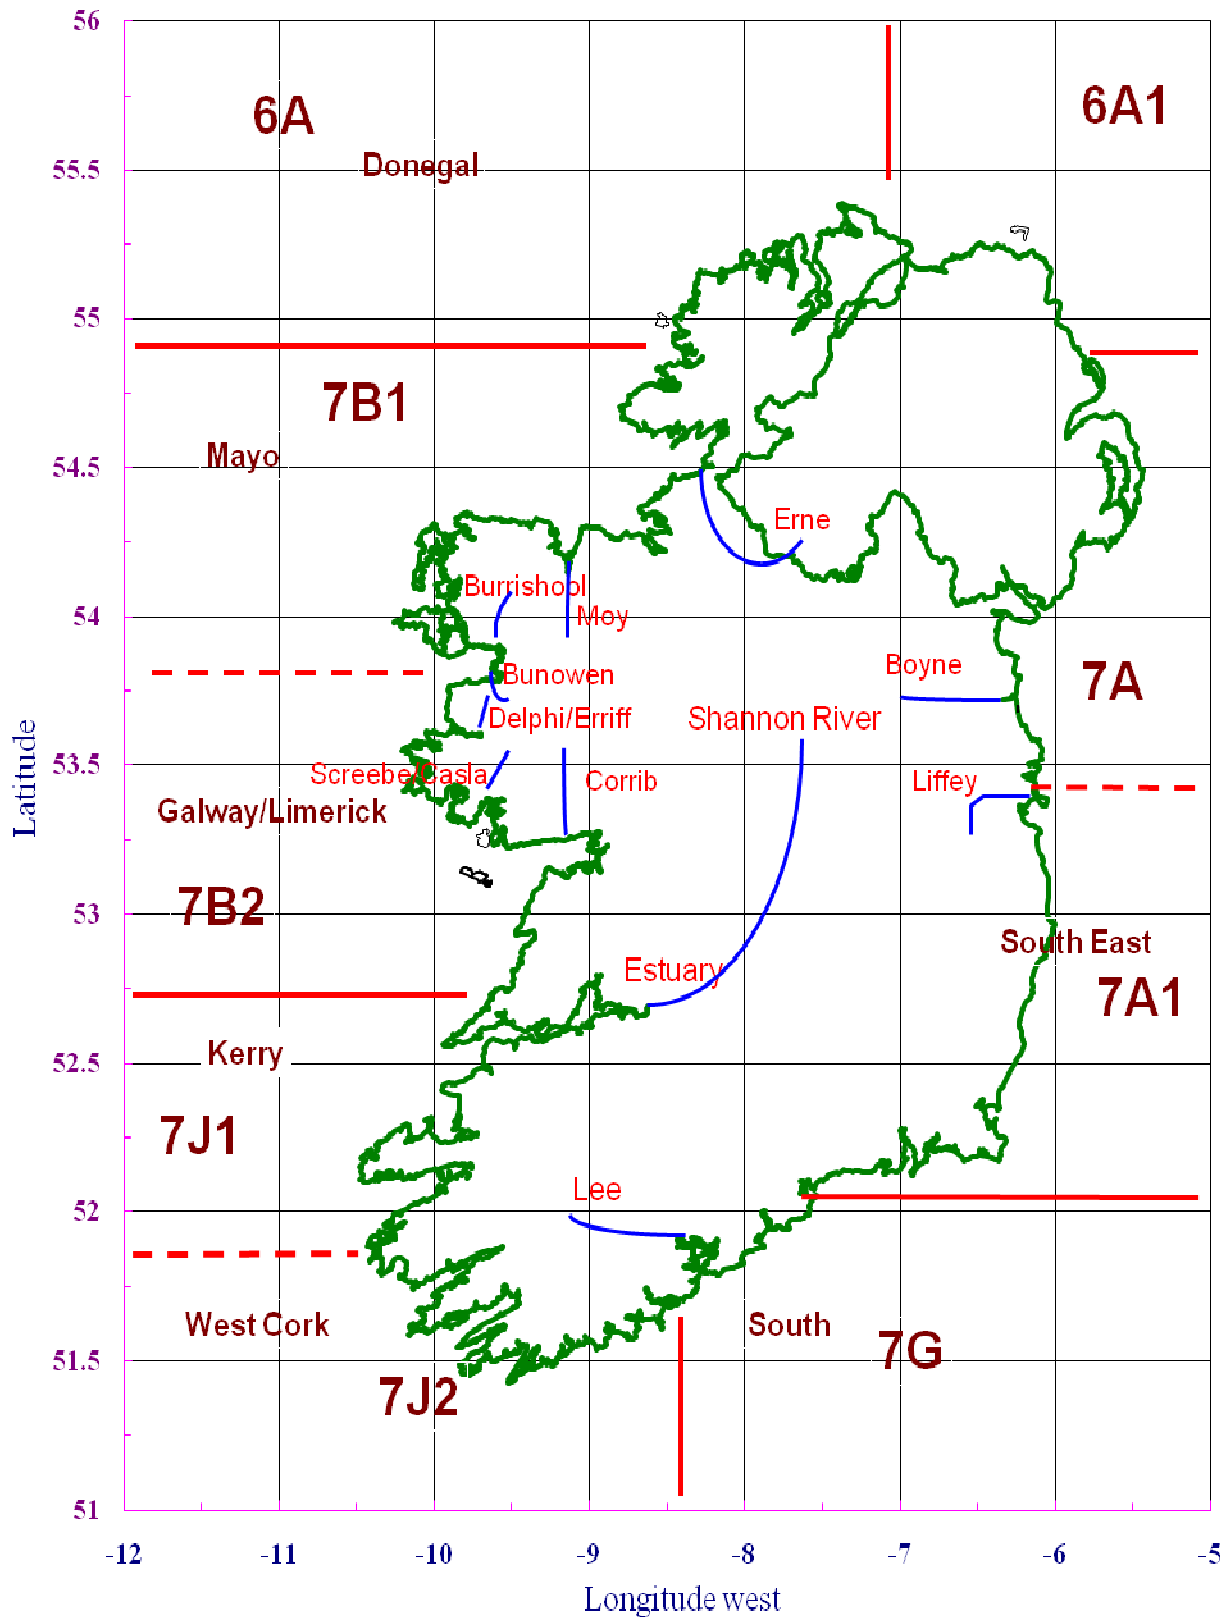

This is the date of recapture. Where the date appears as 00/05/09, the day is not known. This affects the numbers in the distribution over time in the summary at the end of each tag code printout, the '00' entries appear in the first part of the month or period.

LENGTH

The length given is the fork length in centimetres.

WEIGHT

The weight is given in kilograms.
